

InsurTech Strategic Rationale

June 2026

bootim

Executive Summary: Embedding insurance into Botim's transaction journeys unlocks a **near-zero-cost recurring revenue stream** with material ARPU upside

THE PROPOSITION

Two embedded micro-insurance products, distributed in-path

Remittance Protect and Loan Protect. Each attaches at the point of transaction, powered by Chubb Digital Partners. Botim distributes. Chubb underwrites, prices, and manages all claims. No insurance risk sits on Botim's balance sheet.

THE USERS

UAE's migrant workforce: underinsured and already on our platform

3.2M breadwinner workers in the UAE. 79% are uninsured. Botim's user base spans the three moments of highest financial vulnerability: sending money home, taking a short-term loan, and buying on instalment.

THE PARTNER

Chubb Digital Partners: full-stack underwriting, claims, and integration

Chubb to handle all licensing required. Integration via Chubb Studio (SFTP phase 1, then API). 50/50 gross premium revenue share. Botim carries zero underwriting and regulatory exposure and near-zero incremental cost.

\$2.0M gross premium opportunity in Year 1

\$1.0M Botim revenue at 50/50 share | Near-zero incremental cost | No underwriting exposure | Scales with transaction volume — zero additional CAC

The embedded insurance market presents a **\$12B** addressable opportunity aligned to Botim's distribution footprint

BOTIM'S DISTRIBUTION FOOTPRINT

1.7M

FinTech active users

YTD Apr-2026 (+95% YoY)

1.2M

Monthly remittance txns

Primary distribution channel

1.1M

Loans disbursed YTD

\$450M+ cumulative volume

34M

Global Botim MAUs

Phase 2 distribution surface

Embedded insurance leverages our existing distribution to **diversify revenue and deepen user monetisation**

USER BASE

3.2M underinsured workers already on the platform

79% of UAE migrant workers carry no insurance. Botim's existing user base directly addresses this segment, providing immediate distribution scale.

TRANSACTION MOMENT

Coverage attaches at the point of financial vulnerability

Remittance and Cash Now are the three highest-intent transaction moments. Embedding insurance in-flow requires no behavioural change from the user.

REVENUE MODEL

Near-zero cost and near-100% margin contribution

Chubb retains all underwriting, pricing, and claims responsibilities. Botim earns 50% of gross premium as a pure distribution fee.

STRATEGIC FIT

Structurally different revenue stream

Recurring, low-volatility revenue uncorrelated to credit performance, reducing concentration risk in the lending portfolio.

Botim's user base is exposed to **income disruption and financial shock with no safety net**, especially relevant in the current macro environment

79%

of UAE migrant workers carry no insurance

Source: Chubb / Dubai Health Authority

3.2M

breadwinners whose families depend on their income

Income interruption creates household-level distress

\$450M+

in CashNow loan volume YTD with no balance protection

Credit default risk falls entirely on the borrower

Loss of life or permanent disability of a remittance sender

The receiving household loses its sole income source with no insurance proceeds to bridge the resulting shortfall.

Loss of life of a CashNow borrower during repayment

The outstanding loan balance becomes a liability of the borrower's estate. Loan Protect settles the balance in full at no cost to the family.

Compromise of a user's wallet through cyber fraud

Remittance Protect indemnifies the user against account takeover and social engineering losses up to the policy limit.

Competitive Landscape: No existing UAE provider serves the migrant worker segment across **key insurance needs**

	Botim x Chubb <i>Embedded micro-insurance</i>	Sharaf / Union <i>Remittance counters</i>	Traditional insurers <i>Hayah, Sukoon, etc.</i>	Employer schemes <i>Taa-meen, basic health</i>	Home-country insurers <i>Local providers</i>

✓ Fully addresses

— Partial / conditional

✗ Does not address

BOTIM'S DEFENSIBLE POSITION: The only player combining transactional distribution scale (1.7M FinTech actives), Chubb's underwriting and regulatory standing, and the trust of an installed app footprint on the migrant worker's phone

Remittance Protect: An **AED 3 monthly cover** protecting users against social engineering and account takeover

COVERAGE

Social Engineering

Funds transferred after deception by phishing, smishing, vishing, or impersonation scams

Account Takeover

Unauthorised transactions from phishing, spyware, or malware. Reportable within 14 days

PRICING & TERMS

AED 3

Premium per 30-day cover

AED 1,200

Sum insured (Up to)

Opt-in

Distribution model

WHY THIS COVERAGE FITS REMITTANCE

- ✓ Cyber fraud is the fastest-growing crime affecting migrant workers in the UAE (UAE residents lose \$746M annually to cybercrime, with 25,000 cases reported per year)
- ✓ Social engineering scams target precisely the audience Botim serves: newcomers transacting with unfamiliar interfaces (56% monthly scam encounter rate)
- ✓ Monthly cover model produces repeat premiums per user, compounding ARPU over time

Loan Protect: A 1.15% loan-attached premium clearing the outstanding balance on death or permanent disability and providing daily cash for hospitalisation

COVERAGE OPTIONS

OPTION 1

Accidental death + permanent disability

Sum insured up to 5x loan amount (max AED 12,800). Cleared in full at policy event.

1.15%
of loan

OPTION 2

Accidental death + PD + temporary total disability

All of Option 1 plus daily instalments covered up to 60 days at AED 36/day if unable to work.

1.35%
of loan

WHY THIS COVERAGE FITS LENDING

- ✓ Unresolved borrower events during repayment transfer the balance to the family, the primary source of customer distress in CashNow
- ✓ Loan-attached pricing is transparent and proportional to risk, eliminating sticker shock at checkout
- ✓ Insurance signals duty of care, lifting borrower trust and supporting higher conversion at the credit funnel

Chubb Digital Partners: A **full-stack underwriting, claims, and integration partner** that carries the insurance risk while Botim distributes

\$200B+

Global premiums written annually

World's largest publicly traded P&C insurer

54

Countries with local licences

Including full UAE insurance authorisation

AA

S&P credit rating

Among the highest in the global insurance sector

THE PARTNERSHIP MODEL

REGULATORY

Chubb holds all required UAE insurance licences

Botim's role is purely distribution. Chubb is the licensed risk carrier under CBUAE.

INTEGRATION

Chubb Studio API for seamless embedding

SFTP integration for Phase 1, API for Phase 2. Botim engineering load is minimal.

COMMERCIAL

50/50 gross premium revenue share

Distribution-only economics. No claims, no underwriting reserves, no capital lock-up. Room for reconsideration after 6 months.

CLAIMS

Chubb can manage the end-to-end claims process

Botim provides the front-end user interface, Chubb processes and pays out. Defined SLAs apply.

Chubb has a track record of **scaled embedded insurance deployments** across digital platforms, payments, and emerging market fintech

REPRESENTATIVE EMBEDDED DEPLOYMENTS

REVOLUT

50M+ users

Embedded travel and purchase protection

Europe, US, APAC

Travel insurance, purchase protection, and ticket cover embedded in the Revolut app. Activated at the point of card transaction, distributed to 50M+ customers.

GRAB

8 markets

Driver, passenger, and merchant protection

Southeast Asia

Insurance products embedded across the Grab super-app: driver income protection, passenger accident cover, and merchant business interruption. Scaled across 8 markets.

NUBANK

90M+ users

Embedded life and accident insurance

Brazil, Mexico, Colombia

Micro-insurance products distributed to Nubank's 90M+ Latin American customer base. Demonstrates the embedded model at scale for digital-first banking platforms.

GCASH

94M+ users

Embedded remittance protection

Philippines

Personal accident and remittance protection embedded directly into GCash's send-money flow. The closest comparable in market segment, product, and corridor to Botim's proposition.

Financial Projections: Year 1 base case of **\$1.0M Botim revenue** with near-zero cost impact, scaling to \$4.2M by Year 3 as attach rates mature across products

BOTIM REVENUE BUILD (\$USD M)

Base case assumes opt-in distribution per Chubb memo (Scenario 3)

KEY ASSUMPTIONS

\$1.0M

Year 1 Botim revenue (50% of \$2.0M gross premium)

ATTACH RATE TRAJECTORY

Y1 5%

Initial attach across all three products, in line with Chubb opt-in benchmarks

Y2 8%

Improved attach as in-app UX, education, and cross-selling mature

Y3 12%

Mature attach at steady-state, supported by claims experience and trust

*Premium pricing and conversion rates per Chubb x Botim quotation (May 2026).
Volume base: 1.2M monthly remittance txns, 130K CashNow loans, 28K SNPL.*

Go-to-Market: Pairing standard fintech launch playbook with a **financial literacy programme** to seed trust before scale

LAUNCH PLAYBOOK

PHASED ROLLOUT

10% cohort soft launch, then scale

Begin with Remittance Protect at 10% of monthly remittance users. Add Loan and SNPL Protect once attach, claims, and NPS data validate the model

IN-APP COMMS

Native-language in-app prompts

Trigger contextual education at first qualifying transaction. Arabic, Hindi, Urdu, Tagalog, and Bengali content available from day one of soft launch

CHANNEL MIX

Owned-channel led, with referral incentives

Push notifications, in-app banners, and unified Help Centre take the lead. Refer-a-friend mechanics layered in once steady-state attach is established

MEASUREMENT

Track attach, NPS, and claims at cohort level

Monitor attach rate, NPS, and claims ratios at each cohort level from day one of soft launch. Gate the scale decision on hitting attach thresholds before expanding to the full user base

FINANCIAL LITERACY & TRUST-BUILDING

Insurance is a trust product. Education is a precondition for attach.

For an audience that has never engaged with insurance, the first interaction must educate, not sell. Done right, this becomes a long-term competitive moat.

Botim Academy: Protect 101

Short-form video and interactive explainers inside the app. What insurance is, what it costs, what triggers a payout, and how to claim. Available in 5 regional languages

"Protect" campaign brand architecture

A single sub-brand across all products (Remittance Protect and Loan Protect) builds recognition. Recurring storytelling around real beneficiaries drives emotional resonance

Community ambassadors and partnerships

Partner with migrant worker advocacy groups, embassies, and remittance corridors to deliver in-person education sessions, particularly in worker accommodation hubs

Claims Process: Chubb owns end-to-end claims management with Botim providing only the in-app interface

CLAIMS WORKFLOW

**01**

Claim initiated

User

User files claim through Botim in-app interface or unified Help Centre. Required documents uploaded directly.

**02**

Claim assessed

Chubb

Chubb claims team reviews evidence, validates coverage eligibility, and runs fraud checks. Botim provides transaction data if requested.

**03**

Decision issued

Chubb

Approval or denial communicated to user via Botim app, with reasoning. Disputes escalated to Chubb senior claims adjuster.

**04**

Payout settled

Chubb

Approved payouts settled directly to user's Botim wallet or, for Loan Protect, applied to outstanding balance.

KEY OPERATING TERMS

14 days**Account takeover reporting window***Per Chubb policy terms***7 days****Temporary disability deductible***Coverage begins from day 8***30 days****Target claim resolution SLA***Subject to final agreement***In-app****User-facing claims channel***Single Botim experience for all claims*

Risks and Mitigations: All material risks are **addressable through partnership structure and operational controls**

REGULATORY

Distribution falls within CBUAE perimeter

MITIGATION

Chubb provides all necessary licensing. Risk and Legal to confirm materiality of outsourcing (if any) per CBUAE rules pre-launch.

CONDUCT

Opt-in toggle perceived as misleading at checkout

MITIGATION

Opt-in model (per Chubb Scenario 3) keeps consent explicit. Bilingual disclosures, plain-language coverage summary, and Compliance sign-off on UX before go-live.

FRAUD

Claims fraud exploiting embedded model

MITIGATION

Chubb owns claim assessment and fraud detection. Botim provides transaction-level data to support investigation. Two-week reporting window for account takeover claims.

OPERATIONAL

Integration or API failure mid-transaction

MITIGATION

Phase 1 launches via SFTP for resilience. API integration in Phase 2 with defined Chubb SLAs and graceful failure modes. BCP documented before launch.

COMMERCIAL

Conversion materially below the 5% base case

MITIGATION

Pricing already conservative versus Chubb's opt-out model (Scenario 1 implied \$11M+ Botim revenue). 5% attach is a downside-leaning assumption with material headroom.

Phase 1 establishes the rails. Phase 2 and 3 unlock a **\$15M+ Botim revenue opportunity** across adjacent insurance verticals

ROADMAP BEYOND PHASE 1

PHASE 1 — LIVE

Remittance and Loan Protect

PHASE 2 — 2027

Travel, Gadget, Cross-Border

PHASE 3 — 2028+

Health, Life, Property, Auto

PHASE 2 PRODUCTS (2027 LAUNCH)

\$3.5M Y3

Travel Insurance

Holiday and visit-home travel

Embedded at the point of flight booking or visa-on-arrival payment. Single trip and annual policies. High-margin product with strong premiums per policy.

\$2.8M Y3

Gadget Insurance

Phone, laptop, electronics

Subscription-based protection for migrant workers' high-value possessions. Attaches at SNPL checkout or post-purchase upsell. Recurring monthly premium.

\$2.5M Y3

X-Border Family Cover

Cover for family back home

Paid in UAE, insured persons sit in receiving markets (PH, IN, PK, EG). The natural extension of the remittance product, with no comparable competitor positioned to underwrite cross-border at scale.

\$1.5M Y3

Income Protect

Job loss and salary disruption

Short-term income replacement for involuntary job loss. Aligns directly with Botim's WPS salary processing relationships and employer integrations.

The Vision: Botim becomes the **insurance home for the MENA undeserved**, with the data moat from payments and lending informing every product

LONG-TERM OPPORTUNITY

\$50M+

Annual Botim insurance revenue at maturity

Combining Phase 1, 2, and 3 products across UAE plus phased international expansion through Botim's 34M global MAU base

BY 2030

InsurTech becomes a meaningful contributor to Group revenue alongside lending and payments

WHY BOTIM WINS THIS VERTICAL

Proprietary data on user financial behaviour

Five-plus years of payments, remittance, and lending data on millions of migrant users creates an underwriting advantage no competitor can replicate at this scale.

Multi-product distribution at near-zero marginal cost

Each new insurance product attaches to existing transaction flows. Cross-selling drives ARPU compounding without proportional cost growth.

Cross-border footprint already in place

International expansion into PH, PK, EG and beyond extends the InsurTech vertical to receiving corridors, creating multi-market underwriting intelligence.

Embedded model precedent set in Phase 1

Successful execution of Remittance and Loan Protect proves the operational and regulatory model, materially de-risking subsequent product launches.

Next Steps: Targeting a Q3 2026 launch with five workstreams running in parallel from approval through go-live

WORKSTREAMS AND OWNERS

01 · GOVERNANCE

IRA approval and Risk Committee sign-off

Strategy / Risk

Finalise outstanding IRA items (DPA, claims process, BCP) and present to Risk Committee for go-no-go decision.

02 · REGULATORY

Confirm CBUAE position on distribution role

Compliance / Legal

Engage CBUAE early to confirm distribution-only role does not require additional licensing. Validate outsourcing treatment.

03 · COMMERCIAL

Convert Chubb quotation to binding terms

Commercial / Legal

Lock 50/50 revenue share, claims SLAs, data sharing parameters, and exit provisions before integration begins.

04 · TECHNICAL

SFTP integration in Phase 1, API in Phase 2

Engineering / Quantix

Identify integration tech lead. Build SFTP file exchange for premium and claims data. Roadmap Chubb Studio API.

05 · LAUNCH

Soft launch on Remittance Protect first

Product / Marketing

Phase rollout product-by-product, starting at 10% user cohort. Monitor attach, conversion, and claims before expanding.
